SMS/MMS MESSAGING FOR ACT! SOFTWARE

The mobilelife™ is an AddOn for SMS/MMS Messaging utility for ACT Software. The robust system architecture of mobilelife™ has been designed and built to enable Small Office Home Office (SOHO) to send SMS/MMS messages via our mobilelife™ messaging centre, as well as corporates who wishes to own their very own SMS/MMS Gateway.

Get instant access to every contact detail to better manage and build your business relationships via SMS/MMS Messaging. With the mobilelife™, users can now conduct Mobile Marketing via ACT!. Every contact detail will be automatically stored into the ACT! Database.

With the latest MMS technology, mobilelife™ is able to send message with up to 5,000 characters.

WHY mobilelife™?

- Intuitive, easy to use, messaging interface
- Direct integration to ACT! Software
- Group SMS/MMS Messaging directly from ACT!
- Single SMS/MMS Messaging directly from ACT!
- Fully SMS/MMS Message Tracking integrated to ACT!
- Low investment cost
- **No additional hardware involved**
- Excellent customer service, training and support
- No programming knowledge required

KEY FEATURES:

- **SMS/MMS Broadcasting** – Send SMS Broadcast to targeted group with just a click of button from ACT!
- **Single SMS/MMS Messaging** – Send Ad Hoc SMS Messages to single user from ACT!
- **Seamless Integration** –SMS/MMS Messages is being stored directly into ACT! Database. Direct retrieval of customer list from ACT! software to conduct SMS/MMS marketing.
- **Easy to Use** – Just click and installation, no technical knowledge required.
